

The accompanying report is

# NATA endorsed

You can be assured it was prepared to exacting international and Australian technical standards by a facility that is regularly audited by the National Association of Testing Authorities.

NATA is a cornerstone of Australia's standards and conformance infrastructure. Its role is to serve the national and public interest by ensuring that member facilities provide test, measurement, calibration and inspection reports that are consistently reliable and of the highest quality.

As a not-for-profit, government-endorsed body of long standing, NATA brings experience, impartiality and best-practice expertise to a huge range of industries. These include biotechnology, IT, health, forensics, inspection and research & development.

More than 3000 laboratories in Australia and worldwide are members of NATA.

When selecting a technical facility, why risk one that hasn't been formally recognised by Australia's national body responsible for technical audit?

Know you can trust the reports your organisation relies on.

For more information, or to verify the facility's membership and scope of accreditation, visit the NATA web site [www.nata.com.au](http://www.nata.com.au)
